

Notification of out of hours work – Kingsford

In planning for Tomorrow's Sydney we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

Standard work hours are Monday to Friday 6am to 6pm and Saturday 8am to 5pm. This notification is for approved work that falls outside the standard working hours. This work will be carried out on the below dates and times to minimise disruption to traffic and to maintain the safety of construction work, residents, businesses and the general public.

Details of work activities

Out of hours work will take place at the following locations and times:

-)] **Anzac Parade, between Barker Street and Rainbow Street, from 20 June to 20 July 2017, 6pm to 6am and 8am to 5pm on Sundays.** Work may continue to 8am on both Saturdays and Sundays.

Efforts will be made to conduct the majority of night time work between Sunday and Thursday; there will be times when it is necessary to work additional nights.

Activities include street light relocation work, excavation, asphaltting, drainage work, geotechnical investigations (potholing and surveying), utility relocations, vegetation work (protecting trees, trimming branches, mulching and possible tree or shrub removal), heritage investigations, track work (concrete pouring, rail delivery and installation, welding, saw cutting and surface finishing), road and footpath pavement work, traffic island and line-marking removal and reinstatement, setting up traffic controls and traffic barriers, signals and signage (approximately 20 nights).

Sewage and water main work will also take place at the Anzac Parade intersections of Meeks Street, Middle Street and Nine Ways roundabout.

You may experience some noise and vibration during this work. Where possible, high noise activities such as saw cutting and jackhammering will not take place for more than two consecutive nights (weather and traffic permitting). Respite periods will be in place to mitigate impacts to residents during noisy activity.

Equipment and vehicles for this work may include radar detection and survey equipment, concrete trucks and pumps, flood lights, vacuum excavation trucks, water blaster truck, coring and drilling machines, excavators (including hammer attachment), cranes, saw cutters, corers, road grinders, tipper trucks, hand tools, water carts, milling machines, rollers, jack hammers, plate compactors, hammer drills, core drill, elevated work platforms, paving machines, bobcats and traffic control vehicles.

Traffic and pedestrian changes

For the latest information on traffic conditions, visit livetraffic.com or download the Live Traffic NSW App.

The Meeks Street pedestrian crossing will be closed at night between **9pm to 5am** for approximately 2 nights during this notified period.

Work will also involve some lane closures under traffic management. Motorists will still be able to travel in both directions along Anzac Parade, with only some minor delays expected. Traffic control will be in place to direct motorists and pedestrians safely around the operations. Access for emergency services will be maintained at all times.
